

Emergency Action Plan Guide

Active Shooter Preparedness

Purpose

The [Active Shooter Emergency Action Plan Video](#) is a virtual learning tool that describes the fundamental concepts of developing an Emergency Action Plan (EAP) for an active shooter scenario. This instructive video guides organizations through important considerations of EAP development utilizing the first-hand perspectives of active shooter survivors, first responders, and other subject matter experts who share their unique insights.

Organizations are encouraged to use this guide as a medium to document the *initial steps* toward creating an Active Shooter preparedness plan. This guide *is not* meant to replace your organization's Emergency Action Plan. Rather, it is a tool that begins the EAP development process.

Pre-Planning Recommendations and Suggested Training

- ✓ Does your organization have an emergency action plan? If so, review your organization's policy or process for creating the plan. Determine if an active shooter preparedness plan can fit into your organization's overarching plan which may already include a plan for fire evacuation, severe weather, and bomb threats.
- ✓ Obtain a copy of the Federal Emergency Management Agency's (FEMA) Comprehensive Preparedness Guide (CPG) 101 "[Developing and Maintaining Emergency Operations Plan](#)" and review the six step planning process.
- ✓ Explore the [Department of Homeland Security's Active Shooter Preparedness Website](#) to better understand the active shooter threat.
- ✓ View the [Options for Consideration Video](#) to recognize possible actions to take if confronted with an active shooter scenario.
- ✓ Download and review the [Active Shooter Preparedness Workshop Series](#) presentations. This six module series contains additional information, instructor notes, and videos that supports the Active Shooter Emergency Action Plan process. The *Planning Steps (1-6)* below will correlate to the Training Modules (1-6) in the presentation slides. *Example: Module 2 will assist with completing Planning Step 2a and 2b.*

How to Use This Guide

Step 1 – Review the pre-planning recommendations and suggested training.

Step 2 – Allot *at least 2-hours* to complete the Active Shooter Emergency Action Plan video.

Step 3 – Watch the EAP video.

Step 4 – Complete *Planning Steps 1-6*. Use the fillable space to document the initial steps required to begin developing the organization's Emergency Action Plan. *Note: The Planning Steps contain information derived from the EAP video and other online resources to help inform the planning process.*

Step 5 – Begin drafting the organization's Active Shooter Emergency Action Plan. Refer to the EAP Guide and resources listed in *Pre-Planning Recommendations and Suggested Training* as required.

Planning Step – 2a

Develop an Active Shooter Prevention Plan

Effective prevention capabilities encompass three areas: training employees to recognize behaviors on the Pathway to Violence, a system for reporting that is tailored to your organization, and development of intervention capabilities that are trained and resourced to appropriately evaluate potential threats.

Pathway to Violence Training: The [Pathway to Violence Video](#) provides information regarding the behavior indicators that assailants often demonstrate before a violent act. It includes law enforcement expert interviews that discuss engagement strategies and recommended responses. Organizations can also refer to the [Pathway to Violence Fact Sheet](#) for additional information. Describe how you will train your organization to recognize the indicators of someone on a pathway to violence.

Observable steps of someone on a pathway to violence.

Emergency Action Plan Guide Active Shooter Preparedness

Reporting Mechanism: Describe the reporting process for your organization. Consider the types of information reportable to supervisors, security, human resources and law enforcement. How will employees know about the reporting process (policy, training, etc.)? How can the organization develop a culture of reporting?

[Empty box for reporting mechanism description]

Note: It's very important to consult with legal advisors throughout the planning process. For example, The Health Insurance Portability and Accountability Act (HIPAA) and Family Education Rights and Privacy Act (FERPA) both have exceptions that allow for information sharing to protect the health and safety of individuals.

Family Educational Rights and Privacy Act (FERPA) A Guide for First Responders and Law Enforcement. What is FERPA? The Family Educational Rights and Privacy Act (FERPA) is a Federal law that protects the privacy of student education records. The law applies to all educational institutions and agencies (termed "schools" below) that receive funds under any U.S. Department of Education program. FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a postsecondary institution. Students to whom the rights have transferred are "eligible students."

Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule: A Guide for Law Enforcement. What is the HIPAA Privacy Rule? The Health Insurance Portability and Accountability Act of 2003 (HIPAA) Privacy Rule provides Federal privacy protections for individually identifiable health information, called protected health information or PHI, held by most health-care providers and health plans and their business associates. The HIPAA Privacy Rule sets out how and with whom PHI may be shared. The Privacy Rule also gives individuals certain rights regarding their health information, such as the right to access or request corrections to their information.

Planning Step – 2b

Conduct a Risk Assessment

Organizations should consider all *threats, vulnerabilities* and associated *consequences* during their risk assessment. FEMA’s CPG 201 “[Threat and Hazard Identification and Risk Assessment Guide](#)” is an effective resource to use when conducting risk assessments. Conducting a risk assessment will ensure organizations understand their situation, prioritize their actions, identify and compare options, and effectively allocate their resources.

An important threat for organizations to consider is *Workplace Violence*. Having an effective workplace violence policy can protect lives and prevent legal liability. Ensure your policy supports the [Occupational Safety and Health’s General Duty Clause](#).

Estimate the Risk Factors your organization faces:

Do you operate a controversial business?	Do you have security measures on-site or off-site?
Does your business have high-stress positions?	What is your organizations security protocols?
Do you have a history of work place violence or prior threats / incidents?	What is your work environment? (open access to the public, large crowds, high-risk neighbors)

List prior threats and violent incidents:

What is the most likely type of Workplace Violence your organization may encounter?

TYPE 1: Violent acts by criminals who have no other connection with the workplace, but enter to commit robbery or another crime.

TYPE 2: Violence directed at employees by customers, clients, patients, students, inmates, or any others for whom an organization provides services.

TYPE 3: Violence against coworkers, supervisors, or managers by a present or former employee.

TYPE 4: Violence committed in the workplace by someone who doesn't work there, but has a personal relationship with an employee—an abusive spouse or domestic partner.

Planning Step - 3

Establish Goals and Objectives

Goals are broad statements of what personnel, equipment and resources are supposed to achieve. Objectives lead to achieving goals and determining the actions that participants in the process must accomplish. Goals and objectives are key to determining operational priorities and resources required to achieve a needed capability.

Active Shooter preparedness goals and objectives may vary depending on an organization's security posture, physical environment and available resources. Consider the following to determine what goals and objectives are needed in your organization. Use the space provided to describe additional goals and objectives.

Updated access rosters
Lockdown procedures
Shelter in place (door locks)

Employees
Visitors
Disabled (Seeing / Hearing impaired)
Non-English speakers

Routes
People with disabilities
Rally points

Organization liaison

Go-bags (facility maps, master keys, etc)

Reporting procedures

First responders / incident commander

Survivors

Family

Media

Hours

Days

Weeks

Months

Years

Anniversary

Active Shooter Preparedness

Planning Step - 5

Draft Plan and Approve

A planning team’s main concern is to develop an Emergency Action Plan that includes all essential information and instructions that protect against an Active Shooter. CPG 101 (pages 3-1 & 4-16) recommends a format that users understand, are comfortable with, and can extract the information they need. Organizations are encouraged to use the Active Shooter Emergency Action Plan Template if they do not have an established format.

Draft the Plan

Determine if the Active Shooter plan will stand alone or supplement a main emergency plan. As seen below, organizations typically have a main emergency plan with annexes that cover specific hazards.

Recommended Rules for Drafting Plans – CPG 101 (page 4-16)

- Keep the language simple and use short sentences in active voice.
- Summarize important information with checklists and visual aids, such as maps and flowcharts.
- Avoid using jargon and minimize the use of acronyms.
- Provide enough detail to convey an easily understood plan that is actionable.
- Format the plan so that readers can quickly find solutions and options.
- Provide mission guidance and avoid discussing policy.
- Ensure accessibility by developing alternate formats: e.g. print, electronic, video.

Emergency Action Plan Guide *Active Shooter Preparedness*

Validate the Plan and Prepare for Approval – CPG 101 (page 4-17)

Check to ensure the written plan supports all goals and objectives developed by the planning group. Coordinate with a legal adviser to confirm plan supports all local, state, and federal regulatory and statutory requirements including Americans with Disabilities Act (ADA) mandates.

Approve and Disseminate

Staff the plan through the organization’s official approval process. This will ensure all relevant staff have input and organization-wide support before senior leadership approval. Once approved, ensure widest dissemination possible using various communication channels. The next step is to begin training and exercising the plan.

Emergency Action Plan Guide *Active Shooter Preparedness*

Planning Step - 6

Training and Exercise

Train

After an Emergency Action Plan is approved and disseminated, organizations should train their personnel so they have the knowledge, skills, and abilities to perform the tasks identified in the plan. Training can be accomplished in a variety of ways including new employee orientation, “All Hands” meetings, conferences and

workshops, newsletters and internal broadcasts, and online courses.

Describe ways your organization can train. **Useful FEMA Online Independent Study Courses**

Exercise

[Surveillance Awareness: What You Can Do](#)

[IS 915](#)

[Protecting Critical Infrastructure Against Insider Threat](#)

Evaluating the effectiveness of plans involves a combination of training events and exercises to determine whether the goals, objectives, decisions, actions, and timing outlined in the plan led to a successful response. Conducting regular exercises help organizations discover resource gaps, develop individual performance, improve coordination with local, state, and federal partners, and identify opportunity for improvement. [FEMA's Homeland Security Exercise and Evaluation Program \(HSEEP\)](#) provides a set of guiding principles for exercise programs. Organizations can use HSEEP to develop, execute, and evaluate exercises that address their Active Shooter preparedness.

In addition, the DHS Sector-Specific Tabletop Exercise Program (SSTEP) provides an exercise planning resource to assist critical infrastructure owners and operators design their organization's tabletop exercise. Contact the Stakeholder Readiness and Exercise Program for more information.

Develop a time line to accomplish the milestones displayed to the right. Leveraging this “crawl, walk, run” method helps organizations prepare their staff and improve their plan.

Remember – Planning is a Process of Continuous Improvement.
